## PROJECT EXPERIENCE

**Love-Match-Calculator** — Back-End Development Project - <https://andres-abreu.github.io/LOVE-MATCH-CALCULATOR/>

- Leveraged knowledge of the back-end development principles to connect third-party api's.
- Worked on a team and utilized agile development practices to collaboratively control the workflow and organization of the application's development.

**Tech-Blog** — Full-Stack Development Project - <https://stark-bastion-74188.herokuapp.com/home>

- Utilized Node.JS and Express.JS to create a blog posting website that uses a MySQL database to handle information storage.
- The application makes use of the Sequelize ORM to modularize the MySQL querying process.
- Enabled login-logout functionality and used a variety of NPM packages to handle session creation, database synchronization, password hashing, dynamic HTML rendering, etc.

**Find-It** — Full-Stack Development Project - <https://limitless-beach-87360.herokuapp.com>

- With a team of 4 [including myself] we built a simple & scaled-down version of a user based e-commerce such as ebay or craig's-list.
- My duties were mainly the back-end development.

## RELEVANT SKILLS

- Version control systems: Git, GitBash, and GitHub
- Intermediate in the main front end languages: HTML, CSS, and JavaScript
  - CSS frameworks: Bootstrap, Bulma
  - JavaScript frameworks: Node.JS, Express.JS, React.JS, jQuery
  - Intermediate knowledge of JavaScript programming concepts: TDD, OOP, and working with RESTful API's
  - Experience with MySQL and MongoDB

## CERTIFICATIONS & TRAINING

**University of Miami • Coral Gables, Miami 06/2022: Certification in Full-Stack Web Development**

- A 24-week, immersive University program in web development and computer science fundamentals. The full-stack curriculum includes HTML5, CSS3, JavaScript, JQuery, React, Node.js, Java, Database

Theory, MongoDB, Heroku, Git, and more.

### **EDUCATION**

**Miami Dade College:** Associates in Business Administration
